CAP COMPONENTS

CROWN

The Crown is the part of the cap that sits on the top of the head. It is comprised of a number of triangular cut pieces known as panels that, when sewn together, create a round shape to fit the head.

A cap crown can either be structured or unstructured.

PANEL

The panels of the cap are the different pieces of material, sewn together, to construct the cap.

Number of panels can range between 5 & 6 panels depending on the style of cap/hat.

BRIM, VISOR OR PEAK

The peak of a cap is also known as the visor or bill. The peak is the horizontal part of a cap and it protects the face from the sun.

It's most often made out of PVC plastic, sewn in between the fabric (canvas, cotton, wool etc.) to keep its curve even after it's been washed.

SWEATBAND

The sweatband runs along the inside of the cap or hat & insures that perspiration is absorbed.

CLOSURE

They close the cap or hat in the back. Our fitted caps & hats are sewn closed and manufactured in a flexible material for a comfortable fit.

Our adjustable caps & hats have a variety of closures, illustrated below.
